STATEMENT OF PURPOSE

Name - **Chital Vishwa Tej Reddy**

Course - **M.S. in Information Systems Management**

University – **University of Illinois at Chicago**

Introduction

I was grown by seeing the fast-changing trends in the technology world. Computer and Information technology become a major part in everyone's life and the boom of artificial intelligence excites my interest. While getting deeper into the technical details, I have figured out that data plays a crucial role in every sector. This made me realise that I want to do MS in Information Systems and decide what my career path needs to be.

As I was interested in learning more about the Communication and technology world, I decided to do my bachelor's degree in Electrical Communication Engineering from Anurag group of Institutions in the year 2020. Those 4-year academic journey was a life-changing experience, where I discovered myself, my abilities, and skills by involving myself into not only academic related events but also into non-academic activities. The program triggered my interest in learning more about the world of technology. This made me choose a job that helped me grow professionally.

After my bachelor's program, I am Currently working as a Program Analyst at Cognizant Technology Solutions. There I have worked in applying managing front-end and back-end development in the company's Portfolio Analyst and Employee Track. Consistently write, translate and code software programs and applications according to specifications. Resolving the Incidents (Tickets) in order to reduce the count on daily basis, as a part of Web Production Support. Design, Run and Monitor software performance tests on new and existing programs for the purposes of correcting errors and general debugging.

STATEMENT OF PURPOSE

Why MS Information Systems

To widen my knowledge and skills, I planned to pursue MS in Information Systems. I always have a desire towards international education. It was one of my goals that I want to do my masters' program abroad. The research of knowing the culture of the USA and the records, events, achievements of the **University of Illinois at Chicago,** is my never-ending craving. To fulfil my long-term desire, I have decided to do MS in Information Systems at your esteemed University.

Reasons to study in USA

All the education providing institutions in the United States of America are all registered with the USA Department of Education & Training, so there is no second doubt raised on the authenticity of the education provider. The degrees, qualifications that are awarded to students are accredited, acclaimed, and valued across the globe, this is the reason why since many ages, USA has consistently gained an edge over other countries. Moreover, it is a land where people speak English on daily given social communication, this will give me ample grounds to improve my language skills every single day; and understanding the fact that USA has been a preferred destination for international students coming from over 170 countries, which means that it is a hub for cultural exchange. Most of the universities in the USA also offer Post Study Work option upon completion of studies. I am sure that USA will be proven a beneficial destination for me to explore and avail quality education with flair and transform me from a person to a competitive professional.

Funding my Education

As a student intending to pursue my Masters in USA. I am completely aware of my financial obligation I need to and should fulfil during my study. My education and living expenses are partially financed through an Education Loan and partially through my parent's savings.

STATEMENT OF PURPOSE

Future goals after the completion of the Masters

Post my masters at your premier institution I look forward to picking up challenging assignments in my country and work towards development and empowering the market and inspire millions of young girls to chase their passion and act as an ambassador for change. I would like to return as a high skilled technical professional with international exposure and join a reputed Technology institution of India who will find great value in my USA education coupled with the already existing Indian experience

The curiosity of knowing the bigger picture of every industry made me apply for the MS in Information Systems at University of Illinois at Chicago. As it's my desire to study in your university and the program I chose will make a great step for my professional development. I wish I will fulfil my desire and move in the right direction with the skills and knowledge I acquired from the data science program. I'm eager to hear about the consideration of my application.

Thank you
